Curriculum Vitae

Summary

Final-year computer engineering (AI & ML) and health science student working on clinical machine learning: interpretable risk prediction, cross-site generalizability and fairness of medical AI, neuroimaging and EEG-based modelling, and evidence synthesis (systematic reviews and meta-analyses). Author of 7 full papers (4 IEEE and 1 Springer LNCS conference papers, 1 workshop paper, 1 proceedings paper) and 4 further accepted conference papers (3 at MetaSphere 2026 with Springer proceedings forthcoming, as corresponding author; 1 first-author IC-AICSE 2026 paper accepted for IEEE publication), 1 journal article, 1 journal letter (in press), and 19 accepted conference abstracts at TCT, AHA Scientific Sessions, SVIN, CNS, ASH, ACG and AADMD, 6 of them as first author (3 published in the *American Journal of Gastroenterology* supplement and 2 to be published in *Blood*).

Research Interests

Clinical AI • Deep learning for neuroimaging (MRI, fMRI) and EEG • Generalizability, domain shift and fairness of medical AI • Interpretable machine learning • Diagnostic-accuracy meta-analysis

Education

Indian Institute of Technology Madras — **India**
Bachelor of Science (BS) in Data Science and Applications, 4-year programme — *2023 – 2027 (expected)*
- **GPA: 3.22/4.0 (ECE/AACRAO)**

Gujarat Technological University — **India**
Bachelor of Engineering (Honours) in Computer Engineering, 4-year programme — *2023 – 2027 (expected)*
- Honours in Artificial Intelligence and Machine Learning **GPA: 3.40/4.0 (ECE/AACRAO)**

University of the People — **USA**
Bachelor of Health Science (Honours), 4-year programme — *2025 – 2027 (expected)*
- **CGPA: 3.88/4.0**

Research Experience

Research Intern — **February 2026 – Present**
MIT Critical Data, Laboratory for Computational Physiology, MIT — *Remote*
- Contributing to SAKSHI, a community-operated investigative platform for accountability in clinical AI deployment, within a 20-member international team.
- Co-authored the SAKSHI workshop paper at the COLM 2026 Workshop on LLM/VLM Deployment Opportunities and Risks in Healthcare [P5].

Research Intern — **July 2025 – September 2025**
University of California, Berkeley — *United States*
- Co-authored a review on quantum-enhanced fiber-optic sensing using quantum metrology.
- Investigated AI and quantum-enhanced fiber-optic biosensors for real-time, non-invasive diagnostics.
- Analyzed the integration of ML with quantum sensing, mapping challenges and sensing mechanisms.

Research Intern — **June 2025 – July 2025**
The LNM Institute of Information Technology — *India*
- Reviewed foundational and recent literature on quantum entanglement, focusing on SVD in bipartite systems.
- Studied entanglement entropy and quantum state separability to support theoretical development.
- Implemented data preprocessing and visualization workflows in Python (Google Colab) for ML-based quantum analysis.

Research Intern — **January 2025 – August 2025**
Texas A&M University–Kingsville — *United States*
- Developed an eigenvector-centrality-based pruning method to improve fine-tuning efficiency in CNNs (ISVC 2025, Springer LNCS [P7]).
- Constructed neuron-similarity graphs to rank neuron importance and pruned low-centrality neurons to reduce model complexity.

- Evaluated on VGG16, ResNet50 and EfficientNet across Oxford-Flowers102, Caltech101 and TF-Flowers, reporting accuracy alongside parameter reduction.

Research Intern **June 2024 – September 2024**

University of California, Berkeley (REYES 2024) *United States*

- Developed a BERT-based model for AI-generated text detection, achieving an **F1-score of 0.9436** and outperforming logistic regression and SVM baselines.
- Built NLP preprocessing pipelines (tokenization, normalization, embeddings); sole-authored paper in the *2024 REYES Proceedings* [P6].

Collaborative Clinical AI & Evidence-Synthesis Research **2025 – Present**

Multi-institution collaborations (cardiology, neurology, neurosurgery, gastroenterology) *Remote*

- Led interpretable and fairness-aware ML analyses for coronary artery disease and stroke risk prediction [A1, A3, A4].
- Benchmarked cross-site generalizability of cardiac AI across 5 international catheterization laboratories (1,190 patients), including a domain-adaptation benchmark [A2].
- Led two systematic reviews and meta-analyses on graph neural networks for pre-operative fMRI in glioma and on EEG machine learning for Parkinson's disease and DBS candidate selection [A5, A6].
- Contributed to diagnostic-accuracy meta-analyses (PRISMA, QUADAS-2, PROBAST, bivariate random-effects models) in gastroenterology, dentistry and neurointervention.

AI-driven severity grading of dental caries: A systematic review, meta-analysis and translational readiness assessment. *American Academy of Developmental Medicine and Dentistry (AADMD) One Voice Conference* (Alliance for Oral Health Across Borders). Poster.

Honors and Recognition

- **Outstanding Poster Presenter award**, American College of Gastroenterology (ACG) 2026 Annual Scientific Meeting (co-authored poster, Abstract S3467).
- Selected for a **moderated poster presentation** (first author), SVIN 2026 Annual Meeting, Las Vegas, NV (Abstract 26-A-1291).
- **Oral presentation** (first author), IC-AICSE 2026, Lalitpur, Nepal (technically supported by IEEE Nepal Section); full paper accepted for IEEE publication.

Technical Skills

Programming Languages: Python (Pandas, NumPy, Scikit-learn, SciPy, statsmodels), R (metafor, mada), SQL (MySQL, PostgreSQL), JavaScript, LaTeX

ML & Deep Learning: PyTorch, TensorFlow, Hugging Face, XGBoost/LightGBM/CatBoost, CNNs (ResNet50, DenseNet121, VGG16, EfficientNet), transformers (BERT), graph neural networks (GraphSAGE, GAT), contrastive learning, domain adaptation (CORAL), model pruning

Computer Vision: YOLOv8 object detection, multi-object tracking, MediaPipe 2D pose estimation, medical image analysis (hand radiographs, MRI/fMRI)

Uncertainty & Interpretability: SHAP, GNNExplainer, Monte Carlo dropout, calibration (Brier score, reliability), selective classification, fairness and subgroup analysis

Statistics & Evaluation: DeLong test, bootstrap confidence intervals, leave-one-subject-out and k-fold cross-validation, Holm correction, Cohen's κ, joinpoint regression, ARIMA forecasting, age-adjusted mortality rates, hypothesis testing

Evidence Synthesis: PRISMA 2020, PROSPERO registration, QUADAS-2, PROBAST, Cochrane RoB 2, QUIPS, Newcastle–Ottawa, DerSimonian–Laird and bivariate random-effects meta-analysis, meta-regression, Egger's test, trim-and-fill

Health & Benchmark Datasets: NHANES, CDC WONDER, RSNA Bone Age, Z-Alizadeh Sani, SKU-110K, LLM-FMS, Oxford-Flowers102, Caltech101

LLM & Applications: LangChain, LangGraph, AutoGen, RAG systems, Flask, Django, Streamlit, REST APIs, Selenium, Playwright

Data Engineering & Tools: Apache Spark, Databricks, AWS (S3, Redshift), ETL pipelines, Tableau, Power BI, Git/GitHub, Jira, Google Colab
